Registration form for UV/VIS Spectrometer (V-550)

Description of Parts and Samples Provided by User (Users must bring their own lens tissue and UV cells):

1. During the borrowing period, if the user causes damage to or loss of the instrument or its accessories due to improper operation, thereby affecting the borrowing rights of subsequent users, the borrower shall bear full responsibility for compensation.
2. Before use, users must sign in on the "Instrument Maintenance and Service Logbook." After use, the instrument and its accessories must be thoroughly cleaned and returned to their proper places. For a first violation, the user's access rights will be suspended for one month. Repeated violations will result in heavier penalties depending on the severity of the case, including suspension for one semester, one year, or even permanent revocation of access. Serious violations may also affect the usage privileges of the entire laboratory.
3. Department users are required to pay an instrument maintenance fund:
 - NT\$100/day (self-operation)
 - NT\$140/day + NT\$280/hour (assisted testing/training)

If the total annual payment reaches NT\$10,000 within one academic year, no further payment is required for that year. Department users may complete payment within the first two months of the following academic year; until payment is completed, further borrowing of the instrument is not permitted.

For users from other departments within the university: NT\$400/sample

For external research institutions: NT\$800/sample

For external commercial organizations: NT\$1,200/sample

The above fees are subject to an additional NT\$280/hour charge for assisted testing/training.

4. If a registered usage period needs to be canceled, the user must notify the technician at least 24 hours in advance. Otherwise, the reserved session will be canceled, normal charges will still apply, and the maximum allowable future reservation period for that user will be shortened.
5. Moving any component of the instrument or installing auxiliary devices on the equipment without authorization is strictly prohibited. Such operations may only be carried out by the technician or Superuser. Violators will be prohibited from using the instrument again.

* This instrument has no designated Superuser. Users must carefully read the manual before use.

* The professor currently in charge of this instrument is Ming-Hua Ho (E2-304).

I have read and agree to the above terms and am willing to comply with the regulations for the management of precision instruments and general equipment.
