Experimental Conditions :

Cell Type :

1. I have read and fully understood the regulations for using the cell culture room.
 2. I agree to comply with the Management Rules for Precision Instruments and Common Equipment, and I accept participation in the rotating weekly duty schedule, including inspection and cleaning of the laboratory.
 3. If any instrument is damaged, or if improper operation causes damage to equipment/consumables belonging to other laboratories, I am willing to take full responsibility for repair or compensation.
 4. Before use, users must first register their usage time in "XXX." After use, the instrument and its accessories must be thoroughly cleaned and returned to their proper places. For a first violation, the user's access rights will be suspended for one month. Repeated violations will result in heavier penalties depending on the severity of the case, including suspension for one semester, one year, or even permanent revocation of access. Serious violations may also affect the usage privileges of the entire laboratory.
 5. The annual CO₂ gas cylinder expenses shall be shared by the six laboratories using this facility (E2-303, E2-503, E2-515, E2-516, E2-719, E2-801). Consumable materials required for cell culture (not listed in the usage regulations) must be purchased independently by each laboratory.
 6. Department users are required to pay an instrument maintenance fund of NT\$5,000 per half semester. If a total of NT\$10,000 is paid within one academic year, no further payment is required for that academic year. The maintenance fund may be paid within the first two months of the following academic year; until payment is completed, further use of the cell culture room is not permitted.
 7. If the reserved usage time is not needed, users must notify XXX at least one day in advance. Otherwise, that usage session will be canceled, and the maximum allowable future reservation period for that user will be shortened.
- The Superusers of this instrument are authorized cell room users (trained and certified students from E2-303, E2-503, E2-515, E2-516, E2-719, and E2-801). Non-Superusers must contact the responsible faculty member before borrowing to arrange an assessment. Use without passing the assessment is prohibited.
 - The faculty member currently in charge of this instrument is Ming-Hua Ho (E2-304).

*The Superusers of this instrument are the users from the cell laboratories (E2-303, E2-503, E2-515, E2-516, E2-719, E2-801).

*The professor currently in charge of this instrument is Ming-Hua Ho (E2-304).
