**Registration form for Viscometer**

No. \_\_\_\_\_

Registration date (Month/Date/Year): \_\_\_\_\_

Registration time: \_\_\_\_\_

Analysis details:

**1. User's familiarity with the instrument:**

- First-time user; requires assistance or training from a Superuser
- Not a first-time user but still requires Superuser assistance or training
- This session will be evaluated by a Superuser
- Qualified to operate the instrument independently

2. During the loan period, if the borrower causes damage to or loss of the instrument or its accessories due to improper operation—thereby affecting subsequent users—the borrower shall bear full responsibility for compensation.

3. Before use, a application form must be completed and the usage must be recorded in the instrument maintenance logbook. After use, the instrument and all accessories must be thoroughly cleaned and returned to their proper places.

For a first violation, the user's access will be suspended for one month. Repeated violations will result in more severe penalties depending on the circumstances, with suspension periods ranging from one semester to one year, or even permanent revocation of access. In cases of serious violations, the usage privileges of the entire laboratory may also be affected.

4. Users within this department are required to pay an instrument maintenance fee: NT\$20 per sample (self-operation), or NT\$28 per sample plus NT\$280 per hour (assisted testing/teaching use).

If the total payment reaches NT\$10,000 within a semester, no further payment is required for that academic year. Department users must settle the maintenance fee within two months at the beginning of the following academic year. Until payment is completed, the instrument may not be borrowed.

5. Fees for other users: NT\$100 per sample for other departments within the university; NT\$200 per sample for external research institutions; NT\$400 per sample for external non-research (for-profit) organizations.

All the above are subject to an additional NT\$280 per hour for assisted testing/teaching.

6. To cancel a reserved time slot, the user must notify the technician at least 24 hours in advance. Otherwise, the reservation will be counted as used, charges will still apply, and the maximum allowable future reservation period may be reduced.

7. It is strictly prohibited to move any components of the instrument or to install auxiliary devices without authorization. Such operations may only be carried out by a technician or a Superuser. Violators will be prohibited from using the instrument.

\*The Superuser is Chung-Yi Chiu (E2-303)

\*The professor currently in charge of this instrument is Ming-Hua Ho (E2-304).

I have read and agree to the above terms and am willing to comply with the regulations for the management of precision instruments and general equipment.
